

NIBRS

national incident-based reporting system

Quick and easy reporting

With TAC 10's NIBRS Repository, your agencies can enter data in several ways:

- batch uploads from RMS
- individual incident entry from any computer with a web browser
- or from any other mass storage device (i.e. CD, USB drive, etc.)

Easily add users, manage permissions, change passwords and much more using our web-based administrative tools. Our solution integrates seamlessly into each state's infrastructure and is configurable to meet each state's unique needs.

Electronic data submission is complete and accurate with TAC 10's error-checking tools. Data in the check system is checked for compliance according to NIBRS Volume IV standards. This component has been field tested in over 150 agencies in 20 states.

Please select the Rejected Records button below to view Rejected Records
